Taipei, Taiwan

THE RITZ-CARLTON®

The brand new Ritz-Carlton, Denver brings luxury to a new altitude. For the safety of its pressures guests, the hotel equipped with most reliable and stable surveillance system, the NUUO H.264 Hybrid system. While travelers discovering the beauty of Rocky Mountains or making business progress, security for person and belonging is the least thing they have to worry about.

The Ritz-Carlton, Denver features 202 spacious guest rooms including 47 suites, 32 Club Level rooms and one Ritz-Carlton Suite. In additional, fitness club, indoor pool, basketball court, and a13,000 square feet meeting space, are all equipped here. With the largest guest rooms in the city, The Ritz-Carlton, Denver provides sweeping views, and luxury to match. The security system for customers from top of the pyramid has to be absolutely tightened.

NUUO H.264 Hybrid system allows Ritz-Carlton to manage over 50 cameras from both analog and IP system, including 3 16ch H.264 and, a 16ch Mpeg-4 Hybrid. The strong capability of video analytics features also applies on this luxury hotel, including "motion," "missing object," "camera occlusion" and, "video loss" detections. The "counting application" also setup to control traffic flow inside of the building and filtering suspicious people. NUUO also provides user-friendly remote surveillance, recording schedule and playback system for Ritz-Carlton to easily monitoring under any circumstances.
